

Download Evidence Based Anaesthesia And Intensive Care

Oxygen therapy is first-line treatment in the management of hypoxaemic acute respiratory failure (ARF). Different oxygen devices have become available over recent decades, such as low-flow systems (nasal cannula, simple facemask, non-re-breathing reservoir mask) and high-flow systems (Venturi mask). Elsevier's Anaesthesia and Intensive Care Medicine is a continually updated, evidence-based, learning resource for trainees. Mapped to the curriculum of both the Primary and Final Fellowship of the Royal College of Anaesthetists (FRCA) examinations, Anaesthesia and Intensive Care Medicine gives you high calibre and concise articles designed to help you pass the FRCA exams.
