This reference list was compiled by Robert Hare for personal use. Most, but not all, of the articles listed on these pages discuss or evaluate the PCL-R, the PCL:SV, the PCL:YV, and other Hare Scales. Links to available abstracts, and when available, links to the full text on the Journal web sites are provided (search for [full text] on the page below). Huntington's disease (HD), also known as Huntington's chorea, is an inherited disorder that results in death of brain cells. The earliest symptoms are often subtle problems with mood or mental abilities. A general lack of coordination and an unsteady gait often follow. As the disease advances, uncoordinated, jerky body movements become more apparent. ...The Effect of Childhood Trauma on Brain Development: As recently as the 1980s, many professionals thought that by the time babies are born, the structure of their brains was already genetically determined.
