Tor is free and open-source software for enabling anonymous communication. The name is derived from an acronym for the original software project name "The Onion Router". Tor directs Internet traffic through a free, worldwide, volunteer overlay network consisting of more than seven thousand relays to conceal a user's location and usage from anyone conducting network surveillance or traffic analysis. Background. The Institute of Validation Technology (IVT) Network Infrastructure Qualification (NIQ) Committee was comprised of industry representatives from pharmaceutical, biotech, laboratory, and services organizations.
