Stack Exchange network consists of 174 Q&A communities including Stack Overflow, the largest, most trusted online community for developers to learn, share their knowledge, and build their careers.. Visit Stack Exchange

All about EAC Estimate At Completion (EAC)  $EAC = AC + (BAC - EV) / (CPI * SPI)$  Used when both Cost & Schedule performance are considered. Estimate At Completion (EAC)  $EAC = AC + BAC - EV$  I know I'm late with the answer to this question, I had the same problem and to solve this I've done following: Created a fake first line holding my formula in both formula sheet and the sheet where I extract the data

About HyperPhysics. Rationale for Development. HyperPhysics is an exploration environment for concepts in physics which employs concept maps and other linking strategies to facilitate smooth navigation.
